Investment Strategy

Using owner-like approach, VIMCO invests only in high-quality companies with superior business models, distinct sustainable competitive advantages and under levered balance sheets that are operated by first-class managers. VIMCO is not interested in companies with inferior economics and no discernible competitive advantage, even if they are statistically cheap. VIMCO employs an unwavering focus on downside protection and avoidance of risk (permanent loss of capital), while concentrating on long-term fundamentals, value creation, free cash flow and absolute valuations. Investment horizon of 2-5 years provides for a low turnover and tax efficiency. A portfolio of 40-60 holdings is a result of VIMCO's unique research engine consisting of comprehensive due diligence, detailed conservative in-house financial models, proprietary "Qualitative Scorecard" and idiosyncratic holdings classification categories (Compounders, Discount-to-Value, Special Situations).
